Professional Summary:

B.Tech Information Technology undergraduate with strong proficiency in Python, Data Structures and Algorithms, Object-Oriented Programming, and scalable web development. Seeking an entry-level Software/AI Engineer role to build, efficient data-driven applications in a product-focused environment.

Education:

Hindusthan College of Engineering and Technology, Coimbatore, 2023 – 2027 (Pursuing)
B.Tech in Information Technology,
CGPA: 8.20 (up to the 6th semester).

Government Higher Secondary School, Krishnagiri, 2023
Higher Secondary Certificate (HSC) – 83.5%.

St. Augustine Matriculation Hr. Sec. School, Krishnagiri, 2021
Secondary School Leaving Certificate (SSLC) – Passed.

Technical Skills:

Programming Languages: Python, Java, SQL.
Web Technologies: HTML, CSS, React.js, Node.js.
Database : MySQL.
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS fundamentals.
Tools: Git, GitHub, Visual Studio Code.

Internship:

Web Development Intern, Dev Technology Solutions.

- Designed and refactored Java-based modules using object-oriented principles to enhance modularity, reduce defects, and improve code maintainability.
- Implemented efficient data handling using Java collections and structured exception handling, improving runtime stability and execution reliability.

Project:

Civic Issue Reporting and Resolution System github.com/NITHESHKUMAR-C/CivicConcerns

- Developed a civic issue tracking web application using React, enabling users to submit issues and track real-time status through API integration.
- Built a reusable web application with modular UI components to improve maintainability and reduce code duplication.
- Tools used: HTML, CSS, React.js, Node.js, API.

IPL Winner Prediction github.com/NITHESHKUMAR-C/IPL-winner-prediction

- Engineered an IPL match winner prediction system using machine learning algorithms trained on historical cricket match datasets.
- Performed Applied data preprocessing, feature selection and model evaluation techniques to enhance predictive performance.
- Tools used: Python, Pandas, NumPy, Scikit-learn, Matplotlib.

Workshop:

Attended a hands-on React.js workshop at Kongu Engineering College on 2025, gaining practical experience in building dynamic, reusable, and component-based user interfaces.

Certifications:

NPTEL: Elite in Cloud Computing, Elite in Cyber Security and Privacy.
Infosys Springboard: Introduction to Artificial Intelligence, Artificial Intelligence for All, Prompt Engineering.
Udacity: Introducing Generative AI with AWS.
