Professional Summary:

Enthusiastic IT graduate with strong analytical, programming, and teamwork skills. Quick learner with a proactive mindset, seeking opportunities to contribute to innovative technology-driven projects.

Education:

Hindusthan College of Engineering and Technology, Coimbatore, 2023 – 2027 (Pursuing)

B.Tech in Information Technology,

CGPA: 8.08 (up to 6th semester).

Meenatchi Matric Hr. Sec. School,Ramanathapuram, 2023

Higher Secondary Certificate (HSC) – 82.3%.

Meenatchi Matric Hr. Sec. School,Ramanathapuram, 2021

Secondary School Leaving Certificate (SSLC) – Passed.

Technical Skills:

Programming Languages: Java, SQL.

Web Technologies: HTML, CSS, React.js, Node.js.

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS fundamentals.

Tools: Git, GitHub, Visual Studio Code, Postman.

Internship:

Java Intern, Internpe.

- Strengthened proficiency in Core Java concepts, including object-oriented programming, arrays, loops, methods, and conditional statements.
- Developed hands-on experience in designing interactive console-based applications with efficient user input handling and validation. Improved problem-solving and analytical thinking skills by implementing application logic and handling edge cases.

Project:

Waste Management Platform: github.com/tjnava30/wastemanagementapplication

- Resolves fragmented civic coordination by connecting citizens, field workers, and government authorities through real-time tracking dashboards.
- Integrated an AI Assistant for segregation guidance and localized the app in English, Tamil, and Hindi .
- Built a gamified Rewards System, a Recyclable Marketplace, real-time Group Chat, and managed backend data securely via Supabase.
- Tech Stack: React, CSS, Gemini API .

E-Commerce REST API & Inventory Management System :

- Built a robust backend using Java, Spring Boot, Spring Data JPA, and MySQL to handle user authentication, product catalogs, shopping carts, and order checkouts.
- Implemented strict validation checks and transaction controls to prevent negative stock levels, race conditions, and partial database writes.
- Configured Hibernate ORM mappings to inherently prevent SQL injection and resolved complex JSON data binding issues for system stability.

Workshop:

Attended a hands-on React.js workshop at Kongu Engineering College, gaining practical experience in building dynamic, reusable, and component-based user interfaces. 2024

Certifications:

NPTEL: Elite in Cloud Computing, Elite in Cyber Security and Privacy.

Infosys Springboard: Introduction to Artificial Intelligence, Artificial Intelligence for All, Prompt Engineering.

Udacity: Introducing Generative AI with AWS.
